

KIDS UNDER CONSTRUCTION'S COVID-19

# VIRTUAL LEARNING ACADEMY

## DAY 6: AIR FLOW CHALLENGE

### MATERIALS NEEDED FOR TODAY:

- painter's tape
- 1 paper plate per child
- 5-6 ping pong balls per child

### DIRECTIONS:

1. Using tape, make a 12-inch square on the floor.
2. Scatter the ping pong balls around the floor, trying to place them 5-10 feet away from the square.
3. Have your children hold a plate and stand along the wall to wait for your signal.
4. Give the participants 3 minutes to fan as many of the ping pong balls into the square as possible using only their plates. Participants can work together to get the ping pong balls into one square. If a ping pong ball is touched, take 2 ping pong balls out of the circle and place them 5-10 feet away from the square as a penalty.
5. For a challenge, give each participant their own square and see who can get their ping pong balls in their square first.

**FAMILY DISCUSSION: WHAT TECHNIQUE DID YOU USE TO GET THE PING PONG BALLS IN THE SQUARE? DID YOU WORK ALONE, OR DID YOU WORK TOGETHER? JOIN THE DISCUSSION AND SHARE YOUR FINDINGS AT:**
